Who We Are

ELVRA AI Solutions is a specialist AI automation partner helping organisations modernise how they work, communicate, and deliver value. We design intelligent AI agents that remove friction from everyday operations — giving teams more time for the work that matters. Our approach is practical, low-risk, and built around the realities of each sector we serve.

> **"AI is no longer a future concept — it is a strategic enabler of productivity, responsiveness, and resilience." – Ed Mant – CEO Elvra AI Solutions**

HOME

01 · INTRODUCTION

Trusted, Proven, Compliant

300+
ORGANISATIONS SERVED

95%
INTEGRATION SUCCESS RATE

99%
DELIVERY SUCCESS RATE

Our systems are built with governance, auditability, and GDPR compliance at the core — ensuring firms adopt AI safely and confidently.

Smarter, faster, more efficient — without replacing human expertise.

02 · OUR APPROACH

A Structured Path to Rapid Time-to-Value

Our delivery model is structured, collaborative, and designed for rapid time-to-value — every project moves through three clear stages.

01

Discovery

We analyse your workflows, challenges and goals to define the right AI strategy.

02

Design & Build

Custom AI architecture tailored to your systems, processes and governance.

03

Test & Deploy

We refine behaviour, ensure accuracy and validate real-world performance.

Organisations begin seeing automation gains within weeks — not months.

02 · OUR APPROACH

A Delivery Model That Performs

99%

DELIVERY SUCCESS RATE

95%

INTEGRATION SUCCESS RATE

Automation gains in weeks — not months.

Enterprise-grade integration connects AI agents smoothly with your existing tools.

Consistent quality across the full project lifecycle — with rapid deployment cycles that turn AI investment into measurable results, fast.

More Than Technology

ELVRA delivers measurable operational uplift — not just tools. Our AI agents reduce admin burden, accelerate response times, and improve accuracy across every workflow.

Teams reclaim hours for advisory, strategy, delivery, and client-facing work that moves the business forward.

Deep sector expertise makes every solution relevant, safe, and impactful.

03 · OUR ADDED VALUE

A Long-Term Transformation Partner

Our systems enhance utilisation, strengthen margins, and improve client and customer experience.

- Outperform traditional operations in speed and scale
- Continuous optimisation keeps systems improving
- Deep sector expertise across every industry
- Strategic support at every stage of adoption

ELVRA becomes a long-term partner in your digital transformation journey.

04 · WHAT WE DO

Intelligent Agents That Do the Heavy Lifting

We build intelligent AI agents that streamline communication, automate repetitive tasks, and connect fragmented systems — **freeing teams from manual admin.**

AI Chatbots

Instant intake, triage, FAQs and real-time updates across channels.

AI Voice Agents

Handle inbound calls, capture details and deliver live information.

Workflow Automation

Scheduling, document routing, reporting and reminders on autopilot.

Custom AI Agents

Multi-step agents that integrate deeply with your existing tools.

These systems handle intake, triage, FAQs, scheduling, document routing, reporting and real-time updates — reducing operational bottlenecks across the business.

04 · WHAT WE DO

Always On, Instantly Responsive, Effortlessly Scalable

24/7 Agents operate around the clock and respond instantly.

ACCURACY Reduce human error and deliver consistent service across channels.

SCALE Absorb peak demand effortlessly without adding headcount.

Integrations connect seamlessly with CRMs, case management, project tools, TMS/WMS platforms and financial software.

AI becomes the quiet engine behind modern, forward-thinking organisations.

05 · THE TOOLS WE USE

The AI Platforms We Build On

A carefully selected AI stack designed for reliability, flexibility, and enterprise-grade performance.

OpenAI GPT Models

Advanced language models for reasoning, content generation, document analysis, and workflow automation.

Claude (Anthropic)

Safe, reliable AI with deep reasoning, long-context processing, and strong governance controls.

LangChain

Orchestration framework connecting models with tools, APIs, databases, and vector stores.

05 · THE TOOLS WE USE

The Search & Retrieval Layer

Fast, accurate retrieval powers grounded answers and reliable research.

Pinecone

High-performance vector database enabling fast semantic search and Retrieval-Augmented Generation.

Perplexity

AI search engine delivering accurate, cited answers for research, insights, and decision support.

05 · THE TOOLS WE USE

Automation & Workflow

Our automation stack enables seamless workflows and scalable AI operations.

n8n

Flexible automation platform connecting APIs, databases, SaaS tools, and internal systems.

Make.com

Visual workflow builder for multi-step automations across operations, content, and service.

Voiceflow

Conversation design for chatbots, voice assistants, and multimodal AI agents.

05 · THE TOOLS WE USE

Voice, Vision & Video

ElevenLabs

Ultra-realistic AI voices, speech-to-text, and voice cloning for voice agents.

Retell AI

LLM-powered phone agents with human-like conversation and ~600ms latency.

Midjourney

AI image generation for branding, concept visuals, and creative assets.

Higgsfield

Cinematic AI video creation for ads, campaigns, and storytelling.

ELVRA AI

SECTOR

06

Accountancy

Smarter financial operations — without the admin drag.

06 · ACCOUNTANCY

The Pressure on Modern Firms

40–60%

OF AN ACCOUNTANT'S WEEK IS LOST TO ADMIN

Compliance demands, client expectations, and operational complexity keep rising.

Manual admin, reconciliations, document chasing, and follow-ups consume time that should go to advisory work.

Talent shortages make workload balancing harder, while data-privacy concerns slow digital adoption.

Outdated workflows create bottlenecks — and strain profitability.

Outdated Workflows, Rising Expectations

Clients expect faster turnaround and transparent communication, while compliance workloads keep climbing.

Firms struggle to maintain efficiency, wellbeing, and retention against growing advisory expectations.

The sector is changing — firms need modern tools to stay competitive.

06 · ACCOUNTANCY

AI Removes Friction, Not Judgement

AUTOMATE Intake, FAQs, document routing, onboarding, reconciliations, reminders, and scheduling.

24/7 Chatbots triage enquiries and give instant updates; voice agents capture caller details.

RECLAIM Firms win back hours for advisory, client service, and strategic guidance.

AI operates around the clock, improving responsiveness and accuracy across every enquiry.

06 · ACCOUNTANCY

The Quiet Engine Behind Modern Practices

AI becomes the quiet engine behind modern accountancy practices.

Workflow automation ensures smoother operations and fewer bottlenecks, firm-wide.

75%

OF UK FIRMS INCREASED TECH INVESTMENT ON EFFICIENCY PRESSURES

06 · ACCOUNTANCY

What Firms Gain

Faster Turnaround

Reduced admin burden and quicker responses across the practice.

Reclaimed Hours

Fee earners return to billable and advisory work, lifting utilisation.

Better Experience

Smoother communication and more transparent client service.

Safe Adoption

Clear audit trails, GDPR compliance, and controlled workflows.

06 · ACCOUNTANCY

A Future-Ready Practice

AI-enabled firms outperform traditional practices in speed, scalability, and client experience.

Support teams become significantly more effective, reducing bottlenecks and improving accuracy.

> **The result is a more responsive, efficient, future-ready practice.**

06 · ACCOUNTANCY

Our Accountancy Solutions

AI Chatbots

Automate intake, FAQs, triage, and updates.

Voice Agents

Manage calls, route enquiries, and deliver real-time information.

Workflow Automation

Document routing, onboarding, reconciliations, reminders, and tasks.

Custom AI Agents

Reporting, research, lead follow-up, and multi-step financial workflows.

06 · ACCOUNTANCY

Built Into Your Financial Stack

Custom AI agents plug into the systems your practice already runs on.

- Practice management systems
- CRMs and client platforms
- Bookkeeping tools
- Tax platforms

Modernise operations — without disrupting established processes.

ELVRA AI

SECTOR

07

Construction

AI for the built environment, property, and facilities management.

07 · CONSTRUCTION

A Sector Under Structural Strain

140,000+

CONSTRUCTION VACANCIES DELAYING ESSENTIAL PROJECTS

The built environment faces structural labour shortages and rising compliance demands.

750,000 workers will retire by 2036, while cost inflation of 3.4% pressures already-tight margins.

Ageing stock adds maintenance complexity as teams juggle fragmented systems.

Workloads expand faster than headcount — creating bottlenecks across delivery.

Systems That Can't Keep Pace

Construction teams struggle with fragmented systems, slow communication, and rising client expectations.

Legacy processes no longer match the pace of modern construction and property development operations.

The sector needs scalable, reliable tools — to reduce friction and improve responsiveness.

Automation Without Replacing Expertise

HANDLE Chatbots manage intake, FAQs, updates, and triage; voice agents route calls and capture details.

STREAMLINE Compliance reminders, onboarding, scheduling, asset updates, and maintenance workflows.

CONNECT AI links fragmented systems, improving coordination and cutting manual effort.

AI operates continuously, supporting project teams, FM, and property management in real time.

07 · CONSTRUCTION

The Quiet Engine of the Built Environment

AI becomes the quiet engine behind forward-thinking built environment organisations.

Real-time information and faster response times keep projects and FM operations moving.

07 · CONSTRUCTION

Outcomes Across the Built Environment

Smoother Operations

Faster communication and reduced bottlenecks across projects.

Reclaimed Hours

Teams win back time for delivery, coordination, and client service.

Responsive Updates

Clients, tenants, and stakeholders get clearer, quicker communication.

Stronger Resilience

Reduced human error and improved operational maturity.

07 · CONSTRUCTION

A Scalable, Future-Ready Operation

With auditability, governance, and GDPR compliance, firms adopt AI safely and confidently.

Support teams become significantly more effective, strengthening operational resilience.

> **The result is a more efficient, scalable, future-ready operation.**

07 · CONSTRUCTION

Our Construction Solutions

AI Chatbots

Automate intake, FAQs, triage, and updates.

Voice Agents

Manage calls, route enquiries, and deliver real-time information.

Workflow Automation

Compliance reminders, scheduling, asset updates, and maintenance tasks.

Custom AI Agents

Project coordination, reporting, lead qualification, and multi-step workflows.

07 · CONSTRUCTION

Built Into Your Project Stack

Custom agents integrate with the platforms your teams rely on.

- Project management tools
- CAFM systems
- CRMs
- Asset platforms

Modernise construction, property, and FM — with measurable impact.

ELVRA AI

SECTOR

08

Consultancy

More capacity for high-value advisory and delivery work.

08 · CONSULTANCY

Rising Demand, Expanding Workloads

£20.4bn

UK CONSULTING SECTOR — GROWING 6.4% IN 2025, 8.7% IN 2026

Consultancies face rising demand, expanding workloads, and pressure to deliver measurable outcomes.

Consultants lose significant time to research, documentation, coordination, and repetitive delivery tasks.

97% of organisations report at least one AI skills gap, limiting capacity for innovation.

Workloads expand faster than headcount — straining utilisation and profitability.

Faster Turnaround, Deeper Insight

Clients expect quicker delivery, deeper insight, and more transparent progress.

Consultancies need tools that reduce friction and accelerate delivery without adding headcount.

The pressure is clear — do more, faster, with the same team.

AI That Supports Every Consultant

DELIVER

AI handles research, reporting, onboarding, scheduling, and document routing.

QUALIFY

Chatbots manage intake and early-stage qualification; voice agents capture client details.

RECLAIM

Consultants win back hours for strategy, delivery, and high-value advisory work.

Custom agents support data research, report generation, lead follow-up, and multi-task workflows.

08 · CONSULTANCY

The Quiet Engine Behind Modern Consulting

AI becomes the quiet engine behind modern consulting practices.

AI improves utilisation, accelerates delivery cycles, and strengthens margin protection.

08 · CONSULTANCY

What Consultancies Gain

Faster Delivery

Reduced bottlenecks and quicker turnaround on engagements.

Improved Utilisation

Teams reclaim hours for client-facing and strategic work.

Insight-Driven Comms

Clients get quicker updates and smoother delivery.

Safe Adoption

Governance, auditability, and GDPR compliance built in.

A Competitive, Scalable Practice

AI-enabled consultancies outperform traditional firms in speed, scalability, and efficiency.

Strengthened margins and responsiveness turn AI into a driver of growth.

AI becomes a strategic enabler of growth and competitive advantage.

08 · CONSULTANCY

Our Consultancy Solutions

AI Chatbots

Automate intake, FAQs, triage, and updates.

Voice Agents

Manage calls, route enquiries, and deliver real-time information.

Workflow Automation

Research, reporting, onboarding, scheduling, and document routing.

Custom AI Agents

Multi-task workflows, autonomous scheduling, data research, and reporting.

08 · CONSULTANCY

Built Into Your Delivery Stack

Custom agents integrate with the tools that power your engagements.

- CRMs
- Project tools
- Delivery platforms
- Knowledge systems

Modernise consulting operations — with measurable impact.

ELVRA AI

SECTOR

09

Legal

Compliant automation that releases billable time.

09 · LEGAL

More Pressure, Outdated Workflows

40–60%

OF A SOLICITOR'S WEEK LOST TO NON-BILLABLE ADMIN

Legal teams face rising expectations, growing competition, and pressure to deliver faster, more transparent service.

Client intake, triage, document chasing, and scheduling consume critical hours.

Rising expectations meet outdated workflows, straining profitability and wellbeing.

Legacy processes create bottlenecks — and increase human error.

09 · LEGAL

Bottlenecks That Cost Billable Hours

Clients demand quicker responses, clearer communication, and proactive updates.

Firms need tools that reduce friction without compromising compliance or professional judgement.

The need is clear — less admin, more billable focus.

09 · LEGAL

Controlled, Compliant Automation

HANDLE Intake, FAQs, updates, document routing, scheduling, reminders, and task management.

TRIAGE Chatbots triage enquiries and give instant updates; voice agents capture client details.

COMPLY Workflows stay controlled, auditable, and compliant — AI never advises on law.

AI operates 24/7, improving responsiveness and reducing bottlenecks across the firm.

09 · LEGAL

The Quiet Engine Behind Modern Legal Work

AI becomes the quiet engine behind modern legal practices.

Firms reclaim hours for billable work, client care, and legal strategy.

09 · LEGAL

What Legal Teams Gain

Faster Response

Reduced bottlenecks and quicker client communication.

Reclaimed Hours

Fee earners return to billable work, lifting margins and utilisation.

Fewer Errors

Support teams become more effective and accurate.

Safe Adoption

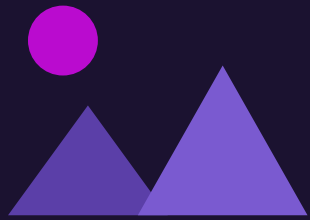

Clear audit trails, GDPR compliance, and controlled workflows.

Safe, Confident Adoption

AI-enabled legal practices outperform traditional operations in speed, scalability, and responsiveness.

Clients receive smoother communication, quicker updates, and more transparent service.

Firms adopt AI safely, confidently, and compliantly.

09 · LEGAL

Our Legal Solutions

AI Chatbots

Automate intake, FAQs, triage, and updates.

Voice Agents

Manage calls, route enquiries, and deliver real-time information.

Workflow Automation

Document routing, case updates, scheduling, reminders, and tasks.

Custom AI Agents

Research, reporting, lead follow-up, and multi-step legal workflows.

09 · LEGAL

Built Into Your Case Stack

Custom agents integrate with your existing legal systems.

- Case management systems
- CRMs
- Internal tools
- Document stores

Modernise legal operations — with measurable impact.

ELVRA AI

SECTOR

10

Logistics

Resilient, responsive, always-on operations.

10 · LOGISTICS

A £1 Trillion Sector Under Pressure

£1tn+

ANNUAL UK LOGISTICS REVENUE — UNDER CONSTANT VOLATILITY

Fuel price fluctuations, supply-chain disruptions, and global events extend lead times and add uncertainty.

Customer expectations have evolved — real-time updates are now essential.

Labour shortages stretch teams, and information is fragmented across multiple systems.

Legacy processes no longer match — the pace of modern logistics.

Fragmented Systems, Rising Expectations

Fragmented operational data limits capacity for strategic improvement.

Organisations need tools that enhance resilience, responsiveness, and efficiency.

The sector needs AI — to stay resilient and responsive.

Instant, Always-On Support

RESPOND

AI answers customer queries instantly and provides real-time tracking updates.

MANAGE

Voice agents handle inbound calls, route enquiries, and deliver information without queues.

STREAMLINE

Automation covers scheduling, routing updates, compliance tasks, and notifications.

AI connects TMS, WMS, CRM, and other systems for cohesive data flow.

10 · LOGISTICS

A Critical Enabler of Resilience

AI becomes a critical enabler of resilience and efficiency across logistics.

AI operates continuously, adapts to peak demand, and maintains consistent service levels.

10 · LOGISTICS

Measurable Logistics Outcomes

190%
AVERAGE ROI FROM AI AGENTS

4.1 mo
PAYBACK ON CUSTOMER-SERVICE DEPLOYMENTS

9x
LOWER COST-PER-TASK

AI reduces cost-per-task, improves service levels, and strengthens operational resilience.

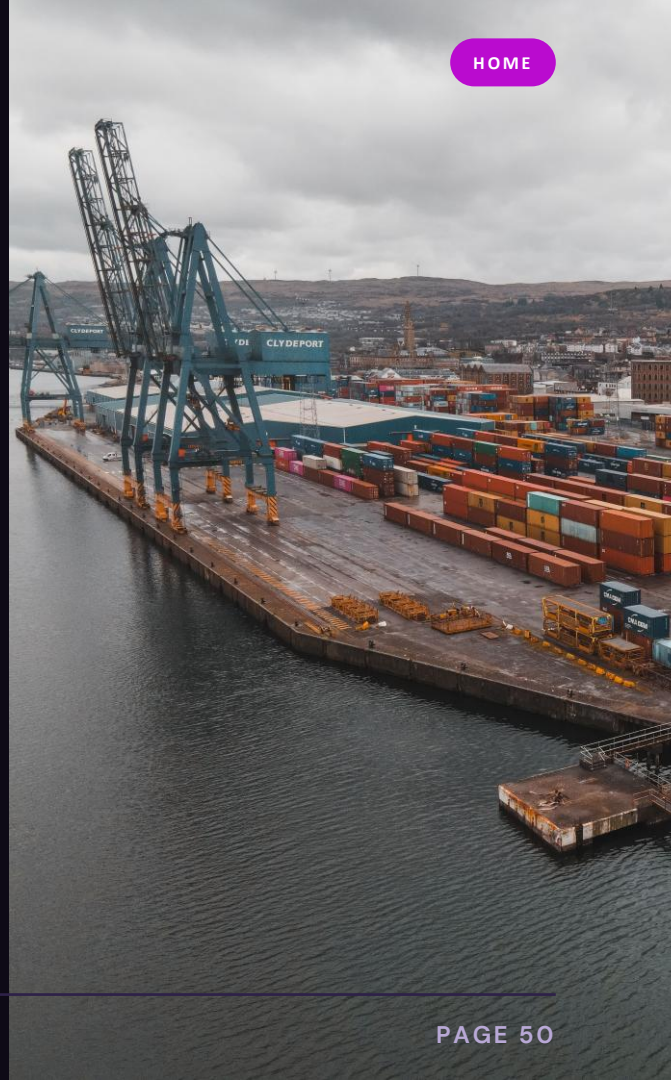

Teams reclaim hours — for coordination and strategic improvement.

Outpacing Traditional Models

Customers receive faster updates, clearer communication, and more reliable service.

AI-enabled logistics operations outperform traditional models in speed, accuracy, and scalability.

> **AI delivers significant, measurable operational uplift.**

10 · LOGISTICS

Our Logistics Solutions

AI Chatbots

Tracking queries, delivery updates, and routine enquiries.

Voice Agents

Manage calls, route enquiries, and provide real-time information.

Workflow Automation

Scheduling, routing updates, compliance tasks, and notifications.

Custom AI Agents

Coordination, reporting, lead qualification, and multi-step workflows.

10 · LOGISTICS

Built Into Your Operations Stack

Custom agents integrate with your core operational systems.

- TMS (transport management)
- WMS (warehouse management)
- CRM
- Other operational systems

Modernise logistics operations — with measurable impact.

ELVRA
AI SOLUTIONS
